

*Savings deal:
50 francs
a year!*

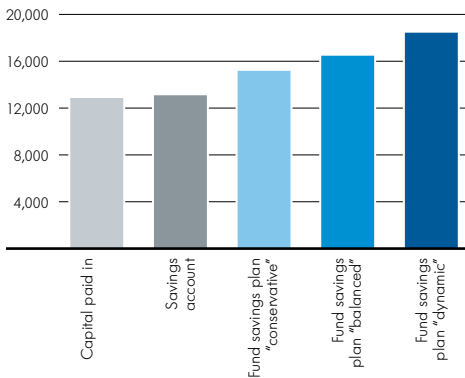

Fund savings plan start

Enjoy an early start with savings and long-term investments.

Saving up for the future

People who save on a regular basis invest systematically and for the long term to realise their life dreams. If you have a Start account set, Zuger Kantonalbank will credit your fund savings plan start with 50 francs a year. It's all very simple: Open a fund savings plan start and set up a standing order to transfer at least CHF 100 a month from your Youth Plus private account. After the client's 26th birthday, the fund savings plan start will continue automatically as a regular fund savings plan.

Example: Savings account vs. fund savings plan start

Example

Stefanie is 22 years old and is investing CHF 1,000 as an initial payment into her ZugerKB fund savings plan start. Afterwards she will invest CHF 100 a month for ten years, thus benefiting from the "average price" effect. On top of that, she receives the CHF 50 a year savings deal until she turns 26. Unlike with an ordinary savings account, Stefanie thus participates in the development of the securities markets and has the opportunity to grow her savings faster (see chart).

Advantages of the ZugerKB fund savings plan start

- Savings deal: annual CHF 50 credit paid into the ZugerKB fund savings plan start, provided the terms and conditions are met
- Potential for higher long-term earnings than with a savings account
- Access to a professionally managed securities solution even with small savings contributions
- Payouts possible at any time

You can find further information (especially terms and conditions plus the legal notice) at zugerkb.ch/fund-savings-plan-start and in the ZugerKB fund savings plan factsheet.
